To download an app on your Mac Specifically to your iTunes If you've ever run iTunes on both Windows and Mac operating system before, you may have found that iTunes for Windows is much slower than iTunes for Mac.. Some one said that this is because Apple isn't serious about iTunes for Windows and wants to show people that iTunes work faster in Mac operating system because it's just better.. By removing unnecessary services and features on iTunes, you can totally speed up your iTunes no matter the operating system.. Personally, I don't think so ITunes is the most popular media manager software on both Windows and Mac, but some features work better and faster in Mac OS, to some extent.
